Blue Springs, MO - The Missouri Innovation Park at Blue Springs continues to progress with the addition of a design team that will complete it's Master Plan. Treanor Architects, Confluence, and Olsson Associates join a blue ribbon team that will make the 500 acre park an extraordinary vision to house 21st Century jobs.

“The Blue Springs Growth Initiative team has been impressed with the Treanor, Confluence, and Olsson team,” said Bill Wrisinger, spokesman for the Blue Springs Growth Initiative. “We look forward to having them remain on our team as we work through the pre-development and master planning phases of the projects. From what I have seen, Treanor, Confluence, and Olsson have embraced our vision of a vibrant and inviting research park in a park-like setting. We have a pioneering vision for the MIP, and we have assembled the talent to make that vision a reality.”

The design team brings extensive expertise in higher education institutions and centers for research. The Missouri Innovation Park is a controlled and master planned development anchored by the Mizzou Center for Innovation. The master plan is committed to sustainable features that highlight the natural assets of the area. The plan calls for groupings of buildings that take advantage of sweeping golf course views and are connected by outdoor collaboration spaces. The plan also enables easy transitions between multi-disciplinary users, all supporting innovative concepts, for education, research, and manufacturing.

Established in 1981, Treanor Architects currently employs 100 professionals and support staff in four locations. Treanor provides a full scope of architectural services for laboratory, educational and research facilities; justice centers; student life facilities; and historic preservation projects across the country and abroad.

Additional information about Treanor Architects is online at www.treanorarchitects.com.
